Date: May 15, 2025

Subject: Consider prescribing preferred Adalimumab biosimilar products

As you know, Keystone First/Keystone First CHC adheres to the Preferred and Non-preferred status and list of drugs included in the Pennsylvania (PA) Department of Human Services (DHS) statewide preferred drug list (PDL). Humira is on the PA PDL as a preferred option, however there are biosimilar adalimumab products included as preferred PA PDL options. Humira is priced at approximately \$7,000/month versus the biosimilar products priced around \$1,000/month. Given the availability of biosimilar alternatives that provide the same clinical efficacy and safety at a significantly lower cost, we ask that you consider a biosimilar to help support the efficient use of finite healthcare dollars while maintaining quality care.

We are respectfully asking your practice to consider prescribing one of the PA PDL preferred adalimumab biosimilars if any of your Keystone First/Keystone First CHC patients are currently prescribed Humira or you are starting adalimumab therapy. The biosimilars are:

- Adalimumab-fkjp
- Amjevita (adalimumab-atto)
- Hadlima (adalimumab-bwwd)
- Yusimry (adalimumab-aqvh)

Scan the QR codes below to access FDA fact sheets regarding biosimilars to address any concerns you may have regarding the safety and efficacy of these biosimilar agents.
